Note

1. Sensitized patients show elevated levels of specific allergens. Generally the higher the kUA/L value, the more exposed the patient is to the allergen.
2. All results should be interpreted in relation to the individual case history.

Comments

Acacia (*Acacia longifolia*) is an evergreen tree or shrub which is popularly grown in green houses and in dry regions of India. This tree is of economic importance yielding gum and also used for ornamental purposes. It is insect and wind pollinated. Hypersensitivity to acacia pollen is IgE mediated leading to Allergic asthma & Rhinitis. Acacia bark and wood contain oils and terpenes which are a source of occupational allergens specially in tanning industry.

Potential Cross Reactivity

Seen with Rye grass, Timothy grass, Bermuda grass and Artemisia.
