

Name	: Mr. DUMMY A057	Collected	: 16/1/2017 1:32:00PM
Lab No.	: 131268797	Age: 23 Years	Gender: Male
A/c Status	: P	Ref By : SELF	Report Status : Final
		Received	: 16/1/2017 1:43:01PM
		Reported	: 16/1/2017 4:32:29PM

Test Name	Results	Units	Bio. Ref. Interval
ALLERGY, INDIVIDUAL MARKER, LEMON, SERUM (FEIA)	0.03	kUA/L	<0.35

**Interpretation**

QUANTITATIVE RESULT IN kUA /L	LEVEL OF ALLERGEN SPECIFIC ANTIBODY	SYMPTOM RELATION
<0.10	Undetectable	Unlikely
0.10-0.50	Very low	Uncommon
0.50-2.00	Low	Low
2.00-15.00	Moderate	Common
15.00-50.00	High	High
50.00-100.00	Very High	Very High
>100.00	Very High	Very High

**Note**

1. Sensitized patients show elevated levels of specific allergens. Generally the higher the kUA/L value, the more exposed the patient is to the allergen.
2. In cases of food allergy, specific IgE antibodies may be undetectable inspite of a convincing clinical history because these antibodies may be directed towards allergens that are revealed or altered during industrial food processing, cooking or digestion and therefore do not exist in the original food for which the patient is tested.
3. All results should be interpreted in relation to the individual case history.

**Comments**

Lemon is available throughout the industrialized world and has many traditional uses in the developing regions. It may uncommonly induce symptoms of food allergy in sensitized individuals. Allergic reactions are mainly contact dermatitis and contact urticaria.

**Potential Cross Reactivity**

Seen among different species of genus Citrus.
