		Received	: 22/3/2018 3:59:43PM
		Reported	: 26/3/2018 1:47:27PM

Test Name	Results	Units	Bio. Ref. Interval
ALBUMIN, CSF (Nephelometry)		mg/L	<350.00

Note: It is recommended to measure albumin in CSF & Serum specimen collected at the same time and determine CSF/Serum albumin ratio to permit diagnosis of blood brain barrier dysfunction.

Comments

CSF albumin concentration is a measure of the integrity of blood/CSF barrier. Albumin is particularly suitable indicator protein because it is neither synthesized nor metabolized intrathecally. In CSF that is free of contaminating blood, albumin must necessarily have come from plasma through blood CSF barrier.
