Test Name	Results	Units	Bio. Ref. Interval
<b>AMYLASE, FLUID</b> (Spectrophotometry)			
Type of Fluid			
Amylase		U/L	Not Established

**Note:** Reference range for Amylase levels in fluid is not established. Physician to correlate clinically.

**Comments**

Amylase activity in fluids is similar to serum levels. In Peritoneal fluid a level >3 times the serum value is indicative of pancreas related ascites / Acute pancreatitis / Pancreatic pseudocyst. Amylase levels in peritoneal lavage may be valuable in patients following blunt and penetrating abdominal trauma. In Pleural fluid levels > 2 times the serum value are indicative of Pancreatitis, Esophageal rupture or malignant effusion.

**Increased Levels** - Gastroduodenal perforation, Acute mesenteric vein thrombosis, Intestinal strangulation or necrosis, Non pancreatic malignancies
