

**CARDIOLIPIN ANTIBODY,
IgG, SERUM
(EIA)**

GPL

<15.00

Interpretation

RESULT IN GPL	REMARKS
<15	Negative
15-20	Equivocal
20-80	Low Positive
>80	High Positive

Comments

Anticardiolipin antibodies (ACA) belong to the group of Antiphospholipid antibodies which are positive in 30-40% cases of Systemic lupus erythematosus and also in patients with other Rheumatic diseases. Presence of cardiolipin antibodies is considered to be of significant diagnostic relevance in cases of Venous / Arterial thrombosis, Thrombocytopenia, Livedo reticularis, Habitual abortions and Neurological manifestations. Elevated ACA levels are also seen in patients with Cardiovascular insufficiency and Myocardial infarction. Results must be correlated with the history and clinical findings of the patient.
