- Note:**
1. Autoimmune reactivities are not by themselves diagnostic, but must be correlated with other laboratory & clinical findings
 2. Test conducted on Serum

Comments

Anti ds-DNA antibodies are detected more frequently and at higher titres in Systemic lupus erythematosus (SLE) patients with Lupus nephritis. Presence of these antibodies or an increase in titre correlate with an increased risk of Lupus nephritis flare. Hence it is useful to monitor Anti ds-DNA antibody levels and initiate appropriate therapy when titres increase.
