

Name	: Mr. DUMMY S209	Collected	: 16/1/2017 12:00:00AM
Lab No.	: 131268861	Age: 25 Years	Gender: Male
A/c Status	: P	Ref By : SELF	Report Status : Final
		Received	: 16/1/2017 1:54:07PM
		Reported	: 16/1/2017 4:46:37PM

Test Name	Results	Units	Bio. Ref. Interval
CHIKUNGUNYA VIRUS ANTIBODY, IgM (ICT)	Negative		

- Note:**
1. Negative result does not exclude the possibility of exposure to Chikungunya virus
 2. False negative results are seen if IgM antibody is below the detectable limit or is absent during the stage of the disease in which specimen has been collected.
 3. All results to be clinically correlated
 4. Test conducted on serum

Comments

Chikungunya is a viral infection transmitted by the bite of an infected Aedes aegypti mosquito. Symptoms are very similar to those of Dengue fever, but unlike Dengue there is no hemorrhagic or shock syndrome. The disease is characterized by rash, fever and severe joint pain (arthralgia). Laboratory diagnosis is critical to establish the cause and initiate specific public health response.
