

Name	: DUMMY	Collected	: 28/8/2017 12:00:00AM
Lab No.	: 135091681	Received	: 28/8/2017 1:56:17PM
Age: 45 Years	Gender: Female	Reported	: 29/8/2017 8:52:40AM
A/c Status : P	Ref By : Dr. UNKNWON	Report Status	: Final

Test Name	Results	Units	Bio. Ref. Interval
PHOSPHOLIPASE A2 RECEPTOR ANTIBODY (PLA2R) QUALITATIVE # (IFA)			
PLA2R antibody #	Negative		

Note:

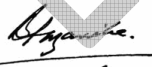

1. Auto Immune reactivity are not by themselves diagnostic and must be correlated with other laboratory and clinical findings.
2. Test conducted on Serum

Comments

This assay detects autoantibodies against phospholipase A2 receptors (PLA2R) which is useful in diagnosis of Primary membranous glomerulonephritis (pMGN). MGN is the most frequent kidney disorder with nephrotic syndrome. Increased proteinuria has a long term risk of morbidity and mortality particularly due to thromboembolic and cardiovascular complications. Autoantibodies of class IgG against PLA2R are highly specific for the diagnosis of primary MGN and can be detected in the serum of up to 70 to 75% patients. The increase, decrease or disappearance generally precedes a change in clinical status.
