CRYPTOSPORIDIUM / ISOSPORA IDENTIFICATION, STOOL (Microscopy)	No oocysts of Cryptosporidium seen		

Comments

Cryptosporidium is a common cause of acute, self limiting diarrhea in normal persons specially children. Cryptosporidium oocysts are refractory to usual chlorination levels of drinking water which may be a cause of epidemics. In patients with AIDS, cryptosporidium may cause chronic secretory diarrhea which may last for years. This test is specially useful in immunocompromised patients presenting with diarrhea.
