Dr Lal PathLabs presents - FIRST TRIMESTER SCREENING, FMF Test[#]

First trimester screen is done on Fetal Medicine Foundation, UK, accredited platform for screening Prenatal disorders (trisomy 21, 18, & 13) to identify those women who are at sufficient risk for a congenital anomaly in the fetus to warrant further evaluation & follow up. The risk is calculated using SsdwLab6 software.

Advantages of FIRST TRIMESTER SCREENING, FMF Test[#]

- ◆ Detection rate is high
- ◆ If the observed risk is low, the patient can be put at ease early in her pregnancy
- ◆ In the event of high risk, more time is available to decide on the diagnostic possibilities
- ◆ Should the patient decide to terminate, procedure is safer when performed in early pregnancy

Added advantages of SsdwLab6 software

- ◆ Type of twinning (Monochorionic & dichorionic twins): The software uses chorionicity-specific medians for calculating MoM [Generation of chorionicity-specific medians* for the biochemical markers and their use in risk assessment improves the performance of first trimester screening for chromosomal abnormalities in twins to a level comparable with that in singleton pregnancies]
- ◆ Fetal dichotomous markers [Short femur, pielectasis, echogenic cardiac foci, echogenic bowel, ventriculomegaly, abnormal ductal flow, Tricuspid regurgitation, single choroid plexus cyst, single umbilical artery] can be included for risk calculation

Specimen:

2ml (1ml min.) serum form 1SST. Ship refrigerated or frozen. Provide maternal Date of Birth, LMP, USG report between 11-13 weeks gestation including CRL, NT & Nasal Bone, number of fetuses; Diabetic status & body weight; IVF, Smoking & Previous h/o Trisomy 21

Requirement with the specimen:

Maternal date of birth, weight, race, diabetic status, smoking history, IVF details & previous h/o chromosomal anomaly

Stability:

Room	Refrigerator	Frozen
8 hrs.	3 days	12 weeks

Report:

Sample by Tues, Thurs, Saturday 9 am; Report same day**

*Reference - Ultrasound obstet Gynecol 2011; 37, 38-47 4.

**Conditions apply: Specimen must reach Dr.Lal PathLabs, Rohini, New Delhi within 24 hrs
Kit is approved by FMF
